### Essay Questions

1. Write an essay in which you describe the tools available to the federal government to influence the direction of the economy.

2. The United States owes a considerable amount of money (the debt). Write an essay in which you discuss why owing so much money (about \$12 trillion) is a problem. Then describe three policies that might reduce the debt. Which of those do you think would have the greatest impact on debt reduction? Support your answer.

3. A lot of people depend on Social Security during their retirement years. Write an essay in which you describe the program. In your answer, discuss what problems the program faces and three policies designed to address those problems. Do you think that Social Security does face serious problems? Which of the policies described above do you think would be the best to adopt? Support your answer.

4. The case study focuses on economic inequality. Some have argued that this is a serious problem facing the United States. Others have argued that the problem is not a serious one and is overstated. Write an essay in which you discuss where you stand on this issue.

5. One of the key concepts discussed in Chapter 2 is political polarization. Write an essay in which you describe how political polarization affects the way the political system addresses economic issues.

6. The chapter on economics spends some time comparing the performance of the economy during various presidencies and in various decades. Write an essay in which compare and contrast the post-World War II decades in terms of economic performance. Be sure in your essay to describe what you mean by economic performance. Which decade do you think had the best economic performance? Why? How much credit or blame should we give presidents for the country's economic performance? Support your answer.
