

Student Name: _____

CH02

Will Print on Test

Saturday, May 19, 2018

___ 1. "The word model has many different meanings, with several that apply to how a teacher might choose to instruct physical education."

- A. True
- B. False

___ 2. "The word model can be used to describe a scaled-down replica of a large object, like an automobile, airplane, or building."

- A. True
- B. False

___ 3. "The scaled-down model allows the observer to more easily see, in miniature, what the larger object looks like from many perspectives, without having the real object in hand."

- A. True
- B. False

___ 4. "Instructional models also serve this same purpose for teachers, by allowing the teacher to better understand a model's design 'on paper' before implementing the full version with students."

- A. True
- B. False

___ 5. "A model's blueprint provides a detailed set of written and drawn plans, including instructions, measurements, locations, and materials that help both the builder and the user understand what the object will look like when completed, and it allows for efficient and correct decisions to be made during the building process. "

- A. True
- B. False

___ 6. "All instructional models are based on a series of written plans that allow a teacher to understand what the model looks like, how it operates, and how it might be implemented for instruction."

- A. True
- B. False

___ 7. "Context plays an important role in the design and implementation of all models, and is just as important for teaching; therefore, it must be considered in the selection and implementation of an instructional model for physical education."
"

- A. True
- B. False

CH02 1

___ 8. "A teacher must be familiar with an instructional model and know how to change the model to fit the particular school setting, grade level, content, and class."

- A. True
- B. False

___ 9. "Most models can be used exactly as they are described in the text, so teachers do not need to spend a lot of time considering their context in selecting and implementing any one of the models."

- A. True
- B. False

___ 10. "Selecting and using the 'right model for the right purpose/s, in the right way' can lead to effective teaching at all times, regardless of content and class contexts."

- A. True
- B. False

___ 11. Physical education programs today can strive for student achievement in any one or a combination of the major learning domains.

- A. True
- B. False

___ 12. Educators generally recognize five major learning domains.

- A. True
- B. False

___ 13. "The cognitive domain includes the recall of facts, the learning of concepts, and the ability to make decisions."

- A. True
- B. False

___ 14. The psychomotor domain includes the learning of fine and gross movement patterns and other body motions.

- A. True
- B. False

___ 15. "The personal domain includes one's feelings, attitudes, social interactions, and perceptions of self."

- A. True
- B. False

___ 16. "If a teacher says 'I really want my students to get better at tennis skills,' she is prioritizing the psychomotor domain over the others."

- A. True
- B. False

CH02 1

- ___ 17. "If a teacher says, 'I am not terribly concerned about skills-I want students to explore each new activity and feel good about it,' he is prioritizing the affective/social domain."
A. True
B. False
- ___ 18. "If a teacher says, 'I really want my students to learn the rules and history of soccer,' she is setting the highest priority in the cognitive domain."
A. True
B. False
- ___ 19. Students will always learn something in the other domains that are not emphasized at the moment. This is called domain interaction.
A. True
B. False
- ___ 20. "Once a model has been developed from a unified theoretical framework, it is possible to conduct research on how best to implement the model, and to test the model's ability to promote the kinds of learning for which it is designed. "
A. True
B. False
- ___ 21. "Every instructional model contains unique terminology used to describe its theoretical framework, design, and operations. We refer to that terminology as a technical language, from which all teachers have a shared meaning for words and terms applied in a model."
A. True
B. False
- ___ 22. Teacher and student operations that suggest ways to teach and learn in each model are called benchmarks.
A. True
B. False
- ___ 23. Each benchmark indicates a certain operation or in-class process that the teacher and/or students will try to follow in each model so that the model is implemented correctly.
A. True
B. False
- ___ 24. Instructional models promote improved formative and summative assessments of learning by monitoring student achievement throughout a unit and at its completion.
A. True
B. False
- ___ 25. Each model is based on a single learning theory that forms the foundation for all aspects of the model.
A. True

B. False

___ 26. "It is important that a teacher does not have unrealistic expectations or misuse a model by setting up a mismatch between the theory, stated learning outcomes, and the model's capabilities. "

A. True

B. False

___ 27. "If a teacher shares most or all of the assumptions behind a particular model, she is more likely to agree with and use the model in her teaching."

A. True

B. False

___ 28. "A good theory must prove itself relevant and practical in a model that can be used in many contexts, across many grade levels, and for many types of movement content."

A. True

B. False

___ 29. A model's theme comes directly from its rationale and might also describe the major learning process used in the model.

A. True

B. False

___ 30. Learning in one domain is more likely to occur than in other domains by the way the model is designed and the way students interact with the content.

A. True

B. False

___ 31. Domain interactions can serve to reduce some of the differences across models used in physical education and can allow teachers to pursue multiple kinds of student learning (to different degrees) in every model.

A. True

B. False

___ 32. "Learning styles describe how each person best receives, assimilates, and acts on perceptual stimuli in the environment."

A. True

B. False

___ 33. The concept of learning styles does not attempt to describe the conditions under which an individual student prefers to be engaged in learning.

A. True

B. False

___ 34. "The collaborative student prefers: small group activities, student-designed activities, group projects, peer assessments, and interaction with the teacher."

A. True

B. False

___ 35. "The competitive student prefers: direct teaching strategies, opportunities to ask questions in class, and teacher recognition."

- A. True
- B. False

___ 36. "The participant student prefers: class discussions, alternative assessments, individual learning activities, teachers who provide opportunities for analysis and synthesis, and enthusiastic task presentations."

- A. True
- B. False

___ 37. "The avoidant student prefers: no required tasks in class, little interaction with the teacher and other students, self-assessment, and no tests."

- A. True
- B. False

___ 38. "The dependent student prefers: self-paced learning, flexible engagement opportunities, student-designed activities, and indirect teaching strategies. "

- A. True
- B. False

___ 39. "The independent student prefers: direct teaching strategies, teacher directed assessments, and clear time lines for class activities and outside assignments."

- A. True
- B. False

___ 40. "To be valid means that a model actually helps students learn what it is designed for, in the contexts for which it is an appropriate way to teach."

- A. True
- B. False

___ 41. "Validation can come from any or all of three primary sources: research, craft knowledge, and intuition."

- A. True
- B. False

___ 42. "Craft knowledge is derived from many teachers' shared experiences of using an instructional model, based on communication among teachers about 'what works and what doesn't work' when implementing any model of instruction."

- A. True
- B. False

___ 43. "Craft knowledge can come from many sources: one's own experiences, interactions at professional conferences, conversations with teaching colleagues, reading journals, and physical education-related World Wide Web sites."

- A. True
- B. False

___ 44. A teacher can select a model because the model appears to be a good way to instruct certain content in certain contexts. That is called personal validation.

- A. True
- B. False

___ 45. Models that are strong on the indirect end of the spectrum give the teacher most or all of the responsibility for making decisions and initiating instructional interactions.

- A. True
- B. False

___ 46. "Models that are strong on the direct end of the spectrum allow students to make many decisions in class, to explore and be creative, and to initiate lots of questions and other interactions with the teacher."

- A. True
- B. False

___ 47. "Models that promote high levels of teacher and student interaction are in the middle, since they feature shared decision making, control, and responsibility in physical education classes."

- A. True
- B. False

___ 48. "Direct teaching is also characterized by one-directional communication, usually from the teacher to students."

- A. True
- B. False

___ 49. "Teachers who prefer indirect instruction view themselves as facilitators of student learning-placing students, not themselves, at the center of the learning process."

- A. True
- B. False

___ 50. "Indirect teachers promote more student thinking and creative movement exploration by posing questions and problems, rather than telling (or showing) students how to move in certain ways."

- A. True
- B. False

___ 51. "It is likely that each model will show some varying degree of directness across several key operations, but most of the operations will be at or near the same general area on the direct-indirect continuum."

- A. True
- B. False

- ___ 52. The engagement pattern at any given time is strongly related to the learning activity and its task structure planned by the teacher.
A. True
B. False
- ___ 53. "Active engagement involves direct personal participation by students. It is characterized by student movement, thinking, questioning, and decision making."
A. True
B. False
- ___ 54. "In passive engagement, students typically receive the content from other sources (usually the teacher) in the form of information given to them. It is characterized by student listening, watching, and reading."
A. True
B. False
- ___ 55. Physical education classes reflect the growing amount of student diversity now found in almost every public school in our country.
A. True
B. False
- ___ 56. "Diversity includes nearly every conceivable combination of gender, race, religion, language, ethnicity, learning ability, and physical ability possibly held by students in our society."
A. True
B. False
- ___ 57. Today's philosophy of involvement challenges teachers to select content and instruct in ways that meet the educational needs of all students.
A. True
B. False
- ___ 58. Support for inclusion is legally mandated for girls by Title IX legislation and for many physically disabled or handicapped students by Public Law 94-142 and IDEA.
A. True
B. False
- ___ 59. "The term inclusive is used to describe any class in which there are students with greatly differing needs and abilities, all trying to learn at the same time."
A. True
B. False
- ___ 60. 'Task presentation' refers to those processes used to demonstrate skills and learning tasks to students.
A. True

B. False

___ 61. "Some models will use just one or two task presentation strategies, while other models will use a number of them."

- A. True
- B. False

___ 62. "In an active demonstration, students follow along as the teacher talks and demonstrates."

- A. True
- B. False

___ 63. "In a peer directed, modeled task presentation, one student provides a model for another student, a group of students, or the whole class."

- A. True
- B. False

___ 64. "Task structure informs students how the learning task will be organized, how they will be grouped, how long it will last, what the performance criteria are, and what the expectations are for student conduct during the task."

- A. True
- B. False

___ 65. "A teacher will need to possess certain kinds of knowledge, skills, and abilities to allow a model to work to its fullest potential."

- A. True
- B. False

___ 66. "Knowledge about content is always important, regardless of the model used."

- A. True
- B. False

___ 67. Necessary pedagogical content knowledge will likely change according to the model selected for each unit and class group.

- A. True
- B. False

___ 68. "Each model's unique set of operations, managerial functions, task presentation strategies, and task structures will determine which teaching skills are needed most when using that model."

- A. True
- B. False

___ 69. "Student abilities and developmental readiness, teacher knowledge, content, length of the unit, equipment, facilities, and available learning resources might be considered in selecting a model."

- A. True
- B. False

CH02 1

- ___ 70. "'Developmental readiness' refers to the students' ability to understand and follow directions, behave safely and responsibly, and have a reasonable chance to succeed at learning tasks."
A. True
B. False
- ___ 71. Instruction that matches student abilities in these areas is called developmentally appropriate instruction.
A. True
B. False
- ___ 72. "Developmentally inappropriate instruction can result in less learning, a lack of student interest, and other negative outcomes."
A. True
B. False
- ___ 73. Each instructional model will call for teachers and students to take on a unique set of roles and responsibilities within it.
A. True
B. False
- ___ 74. A teacher should never make modifications to a model before or during a unit of instruction.
A. True
B. False
- ___ 75. "When needed, modifications should be planned systematically with the aid of process and achievement assessment information whenever possible."
A. True
B. False
- ___ 76. Perhaps the best way to select an appropriate model is to ask a series of questions that will lead to making the best choice.
A. True
B. False
- ___ 77. "Sometimes the answers to a teacher's questions will identify more than one model that will be effective in a given situation. In that case, the teacher should use the model he or she 'likes the best' in the unit."
A. True
B. False
